### EDUCATION

#### APTECH 2025

- WEB DEVELOPMENT
- PYTHON PROGRAMMING

#### APPCCLICK

- Mobile App Development

#### ONLINE

- React with Mosh Programming
- React with WebDev Simplified
- React with Codevolution

### ABOUT ME

I am a dedicated **Web Developer** with strong expertise in **React**, **TypeScript**, and **JavaScript**. Over the years, I've built and delivered multiple high-quality, user-friendly, and visually appealing websites for brands across different industries.

I have developed websites such as:

**KidsEmpathy** – a charity organization focused on supporting children and communities  
[kidsempathyinitiative.org](http://kidsempathyinitiative.org)

**AdoreTheBrand** – a modern e-commerce platform specializing in footwear  
[Adorethebrand.com](http://Adorethebrand.com)

**SuperB** – a stylish clothing brand with a clean and responsive web presence  
[Superbrtw.com](http://Superbrtw.com)

**BabsteveSolar** – a solar company offering sales and solar installation services  
[babsteve.com](http://babsteve.com)

...and many more fully functional web projects.

I also have basic backend knowledge, with solid experience in API integration, enabling me to connect front-end interfaces with real-world data and backend systems effectively.

Beyond web development, I build mobile applications using Flutter and Dart, expanding my ability to deliver cross-platform digital solutions.

To make accessing my work even easier, I have also added a barcode (QR code) below that links directly to my portfolio, allowing anyone to instantly view my projects and experience what I can do.

I'm dedicated to creating modern, intuitive, and impactful digital products for individuals, brands, and businesses.
